Death of Charles Folsom.—Village Notes.

The death of Charles Folsom, brings Monday morning, October 31, early a sense of personal bereavement to almost every person in town. For 70 years he had lived in Lyndon and been honored, respected and loved by his people. Charles Folsom was born in Wheelock, June 6, 1823. His parents were James and Lucy Folsom, his mother being a Sanborn of the Sanborn family of Sanborn, N. H., with many connections in this vicinity. His descent on both sides was from that good, clean, old New England stock, of "plain living and high thinking." Of the six children of the family, two boys went West as pioneers and died there years ago, one was Dr. Folsom of St. Johnsbury; Samantha married Jeremy Pearl of Lyndon; and Amanda lived with her brother, Charles, and alone now survives him. In 1840 the Folsoms moved from Wheelock to the home farm in Lyndon, where Charles and Amanda Folsom have lived for 70 years. Here the father and mother died, and here a new home was established in 1848 by the marriage of Mr. Folsom to Flavia McGaffey of Lyndon. For 58 years Mr. and Mrs. Folsom lived a life of peaceful happiness in this pleasant home, carrying on their appointed tasks and rearing their children in this wholesome atmosphere. Three children, all living, were born to them, Harley B., of Lyndonville, Stephen of Los Angeles, Lucy, Mrs. Albert M. Stone of St. Johnsbury Center. There are three grandchildren now living, Fred and Flavia Folsom, Agnes (Stone) Steele, of Manchester, N. H., and two great grandchildren, the children of Fred Folsom and Mrs. Steele. The outward events of these 70 years are shortly chronicled. Mr. Folsom was emphatically a man who loved his home, and the even tenor of his life too well to wander from it. In all these years but two trips from home are recorded, on visit to New Mexico, and the time spent in Mont-

Mrs. E. C. Everly.

"I FEEL well, never felt better; thanks for your attention and Peruna."

"I will be glad to do all I can in the way of advancing the sale of your valuable medicine."

"I do think Peruna the best medicine I have tried at any time."

"Since I began taking Peruna we have never been without it."

"I really believe that every woman in the world ought to have Peruna on hand all the time; for if she gets tired, Peruna refreshes her; if she gets nervous, it soothes her; if despondent, it cheers and invigorates."

"It is a constant friend to the nursing mother, both for herself and for her child, and finally when old age comes on, no medicine on earth is of greater efficacy to the woman."

"Surely, Peruna is the woman's friend."—Mrs. E. C. EVERLY, 2103 Franklin St., Philadelphia, Pa.

Stronger Than for Years.

Mrs. Caroline Sandheimer, Clarke, Louisiana, writes:
"I am feeling quite well now. I can work again and am stronger than I have been for years, and I do believe that Peruna saved my life. I will advise all I can to take your medicine."

Man-a-lin an Ideal Laxative.

pellier in 1892, when he a life long democrat, was elected representative by a strong republican town solely through personal popularity. He has also held the office of selectman, but has never been an office-seeker or lover. On October 12, 1906, Mrs. Folsom died, after a life not exempt from trouble, but on the whole one of peace and happiness. Her husband has survived her four years, vigorous in mind and body, except for his sufferings from rheumatic troubles. There was no illness but a gradual weakening of the vital powers, and an instantaneous passing away. To describe Mr. Folsom as a man of truth, purity and integrity of character, respected by all, seems but half the story. To appreciate him one must have known him. Kind, genial, unselfish, sturdy independence, equally at his ease with high or low, scrupulously fair and generous in his dealings, emphatically a man of "the square deal." His loss is felt as a personal one by all. His familiar figure, so well known on our streets, will be greatly missed. Funeral services are to be held at his late home this afternoon at 2 o'clock, conducted by Rev. E. G. French and Rev. I. W. MacLaughlin.

The great question now on the lips of every citizen is "Where are our street lights?" No satisfactory explanation has been given to the public as to why we are compelled to walk in total darkness and see no promises of future relief. Is it not about time the owners of the electric plant should know just why the street lights are out of commission so long?

GIFTS TO HOSPITAL.

A Memorial to Mary J. McLeod and Another in Memory of Selim Newell.

Brightlook hospital has recently received from friends gifts which substantially and eloquently tell that many people are standing back of a work they believe in.

The mention of these gifts is made in these columns not alone to publicly express a gratitude the officers deeply feel but also to remind many of the hospital's constant need, in its ministry to the sick and suffering.

This mention may also serve as a gentle reminder to many as to just how substantial aid may be rendered.

Angus H. McLeod has given the hospital the sum of \$250 in memory of his wife, Mary J. McLeod. This sum has been added to the "Memorial Free Bed Fund."

In memory of Selim Newell, M. D., his children have presented the hospital with a sturdy, solid mahogany clock of the old fashioned type. This modern "old clock on the stairs"—"week in, week out"—begins its service of memory and practical use under peculiarly happy circumstances.

Through "the children," the clock and the memory of a man whose ministrations brought relief, health and cheer to many of an earlier day, one can see that the man and his deeds are alive to-day.

What better way is there to keep alive the noble traits of those once and always loved?

On the clock is a tablet on which is inscribed the following:

In memory of Selim Newell, M. D.

Presented to Brightlook Hospital by his children

in loving remembrance.

The following has been prepared: Sketch of Dr. Newell.

Dr. Selim Newell was born in Burke, Vt., August 3rd, 1803. He came of good Revolutionary stock, his father, Capt. Daniel Newell, having served in the War of the Revolution and serving among the troops that rallied against Gen. Burgoyne's army.

Selim was the youngest of a large family of children. His early days were spent in the town of his birth. In 1834 he married Emeline Denison, only daughter of Judge George Denison, a physician.

Soon after his marriage he moved to Lyndon and later in the fall of 1853, he came to St. Johnsbury and here he continued in active practice until the time of his death. In 1864 he was appointed by Gov. Erasmus Fairbanks to hospital service in Fredericksburg, Va., caring for wounded soldiers of the Civil War. The following year, with health impaired, he went abroad in company with Rev. E. C. Cummings, his pastor and valued friend.

Here, in time that was planned for rest and recuperation was spent in study in the larger hospitals of Edinburgh and elsewhere, acquiring the further knowledge in surgery which was of so much benefit in his later practice, as there were at that time no hospitals in St. Johnsbury or vicinity. He died August 23, 1871, in his home—now the North Church Manse—and his funeral, by request of many friends, was held in the old North Church.

There could be no more fitting tribute to his life and character than that which was given at the time of his death as follows:

The funeral services of the late Dr. Newell were held at the North Church, on Saturday last at 10.30 a. m. Rev. Mr. Cummings, late pastor of this church spoke of his unusual aptitude for, and enthusiasm in his profession, of his profound and ready insight, of his accuracy and breadth of professional knowledge, of his high professional conscientiousness, of his tenacious and tender devotion to his patients, especially of his remarkable fitness for great and extreme emergencies.

He spoke also of his marked and unique character as a man, not faultless, but always generous in his impulses, forgetting his own interests in his professional and humanitarian zeal, highly regardless of the welfare of his family, always respectful of sacred things. These last months he seemed drawn towards the higher things, and at last, as of the man of Tarsus, it could be said, "Behold he prayeth." Altogether it was such a delineation of the man as commends itself to the public judgment.

We were made to feel our loss. When shall we see his like again?

Death of Dr. Newell.

Selim Newell, M. D., died at his residence in this place on Wednesday afternoon, August 23d, aged 68 years. Although struggling against disease and increasing infirmity for several years past, his last sickness was very brief.

Dr. Newell was a remarkable man. With great powers of perception, sound judgment, a steady and skillful hand, and an earnestness and enthusiasm for his profession, he acquired a place among the learned and skillful physicians and surgeons of his day which all admitted, and multitudes gratefully remember.

Self-denying, self-sacrificing, and devoted to his patients, he was a great personal discomfort, and risk of health and even life, he went about doing good, when, in these last few years, he was in such a state of physical incapacity and exhaustion as to be a marvel to all who knew him.

For forty years Dr. Newell had practiced his noble profession in this country, of which he was a native; and hundreds of people who see this paragraph will mourn for him as for one who has been a friend to them in their sorest need, and will cherish his memory with the deepest affection.

I.—Keeping Trees Healthy.

[Copyright, 1910, by American Press Association.]

IN Scripture we read of "the trees of the Lord," and, lo, one of them is here before you, caught by the camera. (See Illustration No. 1.)

What an embodiment of Innocence! How majestic! How "fearfully and wonderfully made!" What a friend of man! How it has stood and wrestled with the storms! There it stands a living tree—aye, a noble creature! Behold those plume-like branches! No two branches alike, no two twigs

the same and no two leaves of exactly the same pattern. Lift the graceful branchlet reverently; thoughtfully, pluck a leaf; study that wonderful organ; examine its petiole (the leaf stock).

Under the microscope the protoplasmic cells are seen to be constructed with just as much inherent intelligence as in the hand or any part of the human body. The petiole, for example, instead of being made of overlapping cells, is made up of spiral cells much like the wire coil spring that pulls the screen door shut. There trace out the veins, veinlets and veinules and see how wonderful it is all filled in with the parenchyma, and then with the microscope look upon that strange but beautiful arrangement for breathing
